

STEAM HAIR SETTING DEVICE

Patent Number: JP1250203
Publication date: 1989-10-05
Inventor(s): WATABE SHOICHIRO
Applicant(s): KYUSHU HITACHI MAXELL LTD
Requested Patent: ☐ JP1250203
Application Number: JP19890022778 19890126
Priority Number(s):
IPC Classification: A45D1/04
EC Classification:
Equivalents: JP1772447C, JP2044524B

Abstract

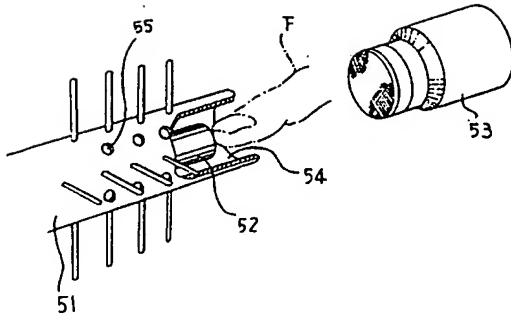

PURPOSE: To operate a device without getting burnt by disposing a first moisture absorbing member covering a steam generating heater, detachably attaching a tank for a steam liquid to the opening side of the end of a hair curling part and exposing a second moisture absorbing member abutting against the first moisture absorbing member on the tank.

CONSTITUTION: In a main body 1, a blower consisting of a heater device 4 for generating a hot blast, a motor 3 and a fan 2 and a hair curling device M at the blow off port 7 side of the main body 1 are disposed. In the hair curling device part M, a steam generating heater 9 and a first moisture absorbing member 1 contacting said heater 9 are disposed in a hollow internal part and a tank 14 for a steam liquid is detachably attached to the side of the opening 17 of the end of the hair curling part M. The first moisture absorbing member 10 abuts against the tank 14, a second moisture absorbing member 15 for supplying the liquid for steam is exposed to cover the steam generating heater 9 by the first moisture absorbing member 10 with the tank detached. Even when the tank 14 is detached, a finger end is prevented from coming into contact with the steam generating heater 9 or a getting burnt is prevented by the dew condensation steam liquid of boiling water.
